

CHRISTMAS CRAFTS

This year has shown us making family memories are invaluable and we think crafting at home does just this!

Try this easy step by step Christmas Bunting guide, to not only keep the kids entertained, but get your house feeling festive too!

You will need:

- Various coloured sheets of felt
- Pencil
- Scissors
- Glue gun or other adhesive

Instructions:

1. Fold a sheet of your felt in half and draw a tree outline. Cut out the outline of a tree and decorate as desired with hearts, circles or stars cut from your felt sheets.
2. Glue the two trees together, sandwiching a rectangle of brown felt in between to act as a trunk. **Note: don't put any glue at the very tip of the tree as the two layers need to open up slightly so you can glue string between them later on.**
3. Once you have up to 10 trees made, glue the tips onto a length of string, keeping the trees 6 inches apart, to make your bunting. Perfect for stringing up on the mantel piece above the fire!
